Backend: Node.js, Express, MySQL, MongoDB
Other: Git, GitHub, Webpack, npm

Open-source

CommunityUI

React, TypeScript, Styled components, Storybook, Jest, React testing library

[GitHub repository](#)

- It is a UI component library that is being developed by a community of developers of all levels
- Contributed to test coverage by writing unit tests
- Collaborated with other developers to discuss project structure and future tasks
- Wrote documentation regarding project structure and contribution guidelines

Projects

EasyAppoint

React, Material UI, React Query, Formik, Express, MySQL

[Live website](#) | [GitHub repository](#)

- An appointment-management app that allows users to add, edit, or delete patient appointments.
- Users can search appointments by patient name, and also sort them by various fields.
- To test the app, log in with **testUser** (username) and **pass123** (password).

Memories

TypeScript, React, Redux Toolkit, Styled Components, Express, MongoDB, Google OAuth

[Live website](#) | [GitHub repository](#)

- A social-media application that allows users to share their memorable moments with others.
- A user can like or comment on other people's posts.
- Posts can be searched by title and/or associated tags.
- Users get recommended similar posts when they visit a post's dedicated page.
- To test the app, log in with **john123@email.com** and **john123**.

Education

McGill University, September 2016 – May 2020

Bsc in Agricultural and Environmental Sciences

Montreal, QC
